The Architectural League of New York, a national organization, was founded in 1881 "to quicken and encourage the development of the art of architecture, the arts and crafts, and to unite in fellowship the practitioners of these arts and crafts, to the end that ever-improving leadership may be developed for the nation's service." Since then it has held sixty notable National Gold Medal Exhibitions that have symbolized achievement in the building arts. The creative work of designers throughout the country has been shown and the high quality of their work, together with the unique character of The League's membership, composed of architects, engineers, muralists, sculptors, landscape architects, interior designers, craftsmen and other practitioners of the building arts, have made these exhibitions events of outstanding importance.

The League is privileged to collaborate on The 1960 National Gold Medal Exhibition of The Building Arts with The American Craftsmen's Council, the only non-profit national organization working for the benefit of the handcrafts through exhibitions, conferences, production and marketing, education and research, publications and information services. The Council was founded in 1943 "to provide education in the handcrafts and to further and stimulate public interest in and appreciation of the work of handcraftsmen." It maintains The Museum of Contemporary Crafts, publishes *Craft Horizons* magazine, and is affiliated with over a hundred local, state and regional craft associations.

The American Federation of Arts, which will circulate the 1960 National Gold Medal Exhibition of The Building Arts to schools, universities, museums and other institutions throughout the United States and Canada, is a national, non-profit, educational organization with headquarters at 1083 Fifth Avenue, New York City. Founded fifty years ago in Washington, D.C. and incorporated 1916 in the State of New York, it is composed of chapter, individual and corporate members. The purpose of the Federation is to cultivate the appreciation and foster the production of art in America. This is carried out through a program of activities including traveling exhibitions, publications, national and regional conferences and consultation services.

Foreword

The theme of the 61st National Gold Medal Exhibition of The Architectural League of New York is achievement in the building arts as exemplified by the progress that has been made, during the last five years, in the interrelated arts of architecture and interior design, engineering, mural decoration, sculpture, landscape design, industrial design and craftsmanship, with special emphasis on both the handcraftsmanship and the technological craftsmanship of building.

Submission of material for the exhibition was open to any practitioner of those allied arts who was a citizen of this country or its territorial possessions whether or not he was a member of The Architectural League of New York or The American Craftsmen's Council. The only qualifications were that the work submitted must be of the highest quality executed between January 1, 1955 and December 31, 1959 and that all submissions in the allied arts must be related to architecture.

The material for the final comprehensive exhibition at the Museum of Contemporary Crafts of the American Craftsmen's Council was selected by Juries of Award of The Architectural League of New York from the invited entries shown in six preliminary exhibitions held at The League from September 10, 1959 through February 17, 1960 and from open submissions received at The League on January 4, 1960.

The Architectural League of New York gratefully acknowledges the close cooperation and support of The American Craftsmen's Council, including Mrs. Vanderbilt Webb, Chairman of The Board, Mr. David R. Campbell, President, and Mr. Thomas S. Tibbs, Director of The Museum of Contemporary Crafts, in the development of this exhibition and its presentation at The Museum. The League is also very grateful to The American Federation of Arts, including Mr. Harris K. Prior, Director, and Miss Virginia Field, Secretary for Exhibitions, for arranging to circulate the exhibition throughout the United States and Canada during the years 1960–1962.

Morris Ketchum, Jr., F.A.I.A.

Awards

To honor the designers of work of exceptionally high merit, the Juries of Award of The Architectural League of New York awarded The League's traditional Gold and Silver Medals and Honorable Mentions in architecture, engineering, mural decoration, sculpture, landscape architecture, and design and craftsmanship.

The Collaborative Medal of Honor of The League was awarded, for the first time, to that project which, in the opinion of the Jury, best exemplified the result of outstanding collaboration between at least four practitioners of the building arts, including architecture and three other categories.
